# တႆး Shan Keyboard

Desktop

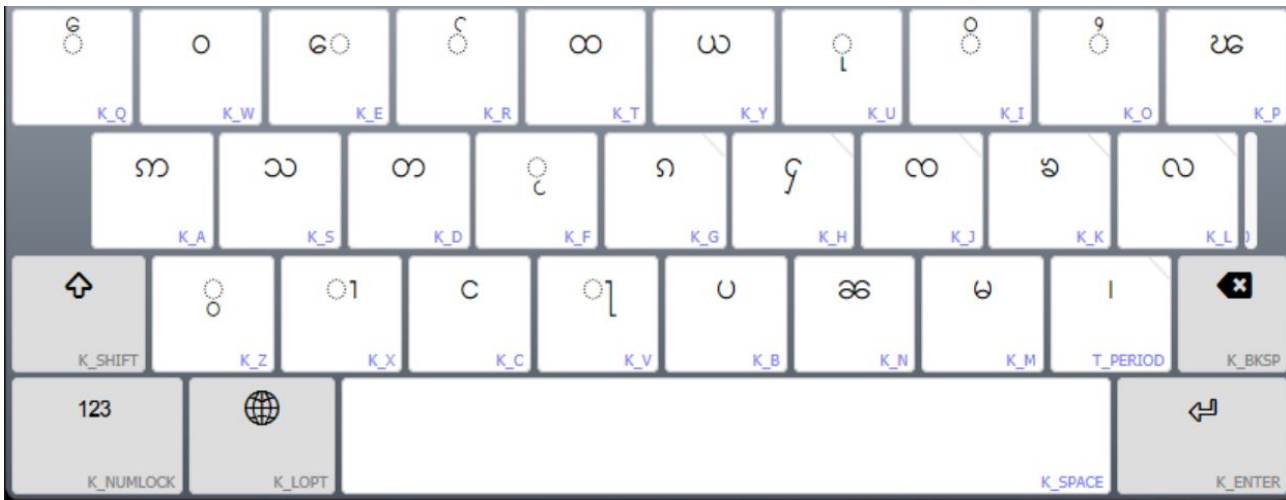

**1. The Shan keyboard layout**

2. The Shan keyboard layout with Shift key pressed

Note: On the desktop, number keys = Arabic numbers, Ctrl+number = Shan numbers, Alt+number = Burmese numbers.

Mobile

1. The Shan keyboard layout for Mobile devices (tables/phones), note it is slightly different than the desktop version due to layout

2. The Shan keyboard layout for Mobile devices (tables/phones), with Shift key pressed

Note: On mobile platforms, the tone marks are on the shift layer, additionally, for those who prefer it, they are also on the g-l keys through long-pressing/popup the keys, i.e. long press g give you the option for ○း Long press h give you the option for ○ၞ etc.
Long press on the period key will give you access to a number of punctations.
Long press on the number keys give you access to Burmese/Shan numbers.
When long-pressing/popup, you need to slide finger to the desired character then release.
